#36 requires copies of deed restrictions, protective covenants and easements be made available. The Applicant testified that he was not aware of any such conditions. Accordingly, a waiver was recommended by the Board's Planner.

#38 requires site photographs. A waiver has not been requested. Because of the nature of this Application, a waiver is recommended by the Board's Planner and Engineer, as proposed Lot 5.04 is wooded, and there are no immediate plans to develop the same.

#40 requires the locations design and dimensions of all existing and proposed structures and wooded areas. The Applicant indicates all existing structures, however a waiver is requested for proposed structures. Because no structure is currently being proposed, a waiver is recommended by the Board's Planner.

#43 requires the existing and proposed use of all existing and proposed structures. The Applicant has indicated all existing structures, and a waiver is requested for proposed structures. Because no structure is currently being proposed, a waiver is recommended by the Board's Planner.

#49 requires the Applicant to provide the location of all existing trees. A waiver is recommended from the tree requirement as no tree removal is proposed at this time. However, trees to be removed must be indicated on future building plans and the applicant must comply with all tree removal ordinance requirements at that time. The Applicant agreed to comply.

#50 requires the Applicant to provide a tree protection plan. Because of the nature of this application, a waiver is recommended by the Board's Planner. The Applicant indicates that compliance will occur at time of building permit.

#53 requires the location of any historic structures within 200 feet. The Applicant should testify as to the location of any properties in the area. The Applicant testified that he is not aware of any historic structures within 200 feet of the Subject Property.

#55 requires the Applicant to provide contours at 20' intervals. Because of the nature of this Application, a waiver is recommended by the Board's Planner. The Township Engineer has required that current drainage and stormwater flow shall be maintained. The Applicant agreed to comply.

#57 requires the Applicant to provide a grading plan. The Applicant requests a waiver, as no grading or construction is proposed. The waiver is recommended by the Board's Planner. A grading plan must be submitted prior to proposed lot 5.04 being developed. The Applicant agreed to comply.

#58 requires the Applicant to provide a soil erosion and sediment control plan. The Applicant requests a waiver, as no grading or improvements are proposed at this time. The waiver is recommended by the Board's Planner, with the concurrence of the Applicant that such a plan shall be submitted should construction be proposed, prior to any building permits being issued. The Applicant agreed to comply.

#59 requires soil borings to determine soil suitability. The waiver is recommended by the Board's Planner, as no improvements are proposed at this time.

#67 requires results and location of all percolation tests and borings for an on-site sewerage disposal system. The Applicant requests a waiver, as the site is already served by a private septic system and no new construction is proposed at this time. The waiver is recommended by the Board's Planner.

#73 requires the Applicant to submit an LOI regarding wetlands from the NJDEP. The Applicant has requested a waiver. The Applicant must submit a signed statement by a licensed PLS or PE in accordance with the requirements outlined in the checklist, and as required under the Board engineer's review letter of March 7, 2018, paragraph G on page 3. The waiver is recommended by the Board's Planner for completeness only. The Applicant agreed to comply.

#75 requires the Applicant to submit a Utility Plan. The Applicant has requested a waiver, as no changes to the existing utilities are proposed at this time. The waiver is recommended by the Board's Planner until such time as building permits are requested for proposed Lot 5.04. The Applicant agreed to comply.

#83 requires the location of existing and proposed curb openings. The Applicant has requested a waiver from location of proposed curb openings until such time as a building permit is requested. The waiver is recommended by the Board's Planner.

WHEREUPON, a motion was made by Board Member Swanson, which was seconded by Board Member Hughes, to grant the above referenced submission waivers, subject to the representations and testimony given by the Applicant as are set forth above, with the following Board members voting in favor of the motion to grant the waivers: White, Poisker, Nicholson, Hughes, McKeever, Shoultz, Schmidt, Swanson and Clark. Board members Goss (Alternate Member #1) and Afflerbach were absent. There were no votes in the negative and no abstentions or recusals. The Board, having granted the submission waivers, subject to the representations and agreements made by the Applicant, the Application was deemed to be complete. The hearing on the Application proceeded.

7. Mr. Alice provided a brief overview of the Application, consistent with the information set forth hereinabove.

8. Mr. Cosaboon reviewed the Plan of subdivision and noted that no bulk variances are required. Mr. Cosaboon testified as to the size and dimensions of the proposed lots, access and egress to and from the proposed new lot and the remainder lot, as well as other aspects of the Plan.

9. The Board's Professional Planner, Candace Kanaplue, P.P., on behalf of Stephen M. Bach, PP, reviewed with the Board Mr. Bach's letter of March 14, 2018 regarding the Application, as follows: No area or bulk variances are required insofar as the Applicant testified that the two prior sheds on Lot 5.01, which didn't meet the setback requirements, have been removed.

10. The Board's Professional Engineer, Stan M. Bitgood, P.E., C.M.E., Federici & Akin, P.A., reviewed with the Applicant and the Board, his letter of October 12, 2017 as follows:

1. Bulk Requirements: The site is in the Low Density Residential District. The table of zoning requirements correctly indicates the bulk requirements and that no variances are proposed.

A. Agricultural buffers are not proposed and would not be required for the proposed residential uses.

B. Setback lines are shown on the site plan.

2. Plat/Plan Requirements:

A. The Applicant should specify whether the subdivision will be filed by plan or by deeds. The Applicant testified that the subdivision would be perfected by the filing of deeds, and agreed to submit copies of the legal descriptions to the Board's engineer for review and approval, and the deeds to the Board's attorney for review and approval as to the form of the deeds, prior to a recording of the same. The Applicant acknowledged that he had 190 days from the date of adoption of this resolution in which to record the deeds.

B. The Applicant shall submit a copy of the existing property deed as a condition of approval. The Applicant agreed to comply.

3. Minor subdivision plans have been submitted for review.

A. The submitted plan references a previous survey plan titled "Plan of Minor Subdivision, for John & Wieslawa Dzieniszewski, Plate 8, Block 21, Lot 5.01." A copy of this survey referenced shall be submitted as a condition of approval. The Applicant agreed to comply.

B. The well and septic locations for adjacent lot 5.02 shall be shown on the plans in order to better determine the possible future locations of well and septic in proposed lot 5.04. The Applicant agreed to comply as a condition of approval.

C. The monument required by M.L.U.L. must be set and called out in the legal description(s). The Applicant agreed to comply.

D. Item 36, copies of deed restrictions and covenants, can be waived, upon satisfactory testimony that no protective covenants, easements, or deed restrictions exist on-site. The Applicant had testified as to the same.

E. Item 49 will be waived, but it shall be recognized that the quantities and sizes of all trees to be removed shall be shown on future building plans. In addition, tree clearing shall comply with any and all ordinances at the time of building application. The Applicant agreed to comply.

F. Item 55, contours at 20' intervals, will be waived, but it shall be noted that the current drainage and storm water flow shall be maintained. The Applicant had agreed to comply.

Item 73: This requirement may only be waived if the site is clearly uplands and the applicant submits a signed statement by a New Jersey licensed engineer or land surveyor that a) he has personally visited the subject property and conducted a site investigation as necessary to determine that there are no freshwater wetlands or transition areas on the subject property b) he has examined the subject property on a national wetlands inventory map c) he has reviewed the soils on the subject property as set forth in the Gloucester County Soil Survey Map as issued by the United States Department of Agriculture d) he has certified that there are no freshwater wetlands or freshwater wetland transition areas on the subject property.

H. Addresses and Lot numbers: This Application will not change the existing address for lot 5.01. The Applicant had agreed to comply.

1. If approved, the Applicant must obtain a new lot number for the proposed lot (referred to as lot 5.04 on the plans) from the tax assessor and provide a copy. The Applicant agreed to comply.

2. If approved, Applicant must obtain new address for the proposed lot (referred to as lot 5.04 on the plans) from Gloucester County 911 Coordinator and provide a copy to the Board's engineer and the Board's secretary. The Applicant agreed to comply.

J. Photos: Recent photos of the site shall be submitted. This has been waived by the Board as the proposed lot 5.04 is all wooded.

4. Curbs & Sidewalks: This Application does not include, nor require, curbs or sidewalks.
5. Lot grading: As no physical improvements are proposed, the Board's engineer had no objection to waiving this. Individual Lot Grading plans are required prior to obtaining building permits for residences. The Applicant had consented to the same.
6. Stormwater Management: No disturbances are proposed, therefore the disturbance and impervious thresholds for stormwater management will not be exceeded.
7. Fences: No new fences or modifications are proposed or required.

3. The Applicant is solely responsible for determining which governmental and/or public agencies, if any, such approvals are required of. The Applicant is further required to submit a copy to the Board's Secretary of all approvals and/or denials received from such outside agencies, with a copy thereof to the Board's Attorney, Engineer and Planner.
