Effective October 5, 2021, applications for most land use authorizations and permits <u>must</u> be submitted electronically through <u>NJDEP Online</u>. Such applications include general permits, individual permits, water quality certificates, freshwater wetland transition area waivers, and associated flood hazard area verifications. Paper applications will **NOT** be accepted for the aforementioned types of authorizations and permits.

Paper applications will be accepted for Letters of Interpretations, modifications to existing permits/authorizations, extension requests for existing permits/authorizations, applicability determinations, Highlands Area applications, stand-alone Flood Hazard Verifications, and consistency determinations. If an application type is not listed on this form and you are unsure if a paper application is acceptable please contact the Division at <a href="https://www.nj.qov/dep/landuse/contact.html">https://www.nj.qov/dep/landuse/contact.html</a>. For more information, please visit <a href="https://www.nj.qov/dep/landuse/eservices/lur\_auth\_permits.html">https://www.nj.qov/dep/landuse/eservices/lur\_auth\_permits.html</a>.

#### FEE CALCULATION TIPS:

- Whenever the calculation requires an acreage figure (including the Stormwater calculations), you will need to round **UP** to the nearest whole number, for example: 0.25 acres gets rounded up to one (1) acre or 2.61 acres gets rounded up to three (3) acres.
- The stormwater review fee is applied only one time per project, maximum of \$20,000, regardless of multiple applications.

APPLICATION(S) FOR: Please check each permit/authorization that you are applying for and fill in the calculated fee (for each) in the "Fee Paid" column

- ii. Proposed boundaries of all on-site wetlands, and/or State Open Waters plus all transition areas (boundary of transition area can be added prior to application or during review);
  - A. When delineating a State open water one to five feet in width measured from top of bank, with no wetland boundary, the delineation shall indicate the centerline of the State open water with several data points numbered and shown on the plans. When delineating a State open water that is greater than five feet in width, the delineation shall include two survey lines, with numbered points, depicting the top of bank on both sides of the State open water;
- iii. Depicts the flags or stakes identifying the boundaries in the field, sequentially numbered, and sequentially numbered line segments between each flag or stake;
- iv. Identifies the location and identifying number of each sample location described in item A above;
- v. Topographic contours as follows:
  - A. If the site is located in Middlesex County or Mercer County or anywhere north of these counties, the survey must show topographic contours at intervals of no more than five feet;

- B. If the site is located south of Middlesex and Mercer Counties, the survey must show topographic contours at intervals of no more than two feet
- vi. A digital copy, georeferenced in NAD 83, of any survey can also be provided in addition to the paper.

# 10. Site requirements:

- i. Boundary Markers: The property boundaries and the proposed boundaries of all wetlands and/or open waters must be flagged and/or staked on the site as follows:
  - A. All flags and/or stakes must be present on the site prior to submission of the application to the Department;
  - B. The flags and/or stakes must be no more than 75 feet apart, must be set in relation to identifiable points and landmarks if possible and from each flag and/or stake you should be able to see the adjacent ones;
  - C. Each flag and/or stake must be uniquely (sequentially if possible) numbered and identified on the survey;
  - D. Flag and/or stakes shall be positioned so that they can be clearly visible at any time and any weather condition during the year, i.e. care should be taken so that flags and/or stakes are not positioned in a location likely to be covered by snow in the winter or overgrown in the summer.
  - E. Flags should not be tied to dead or annual vegetation.
- ii. Sample locations: All sample locations referenced in the data sheets must be clearly marked in the field.
- 11. Isolated wetland: If the applicant would like the Department to verify that a wetland is an isolated wetland, a request for that determination, and supporting documentation demonstrating that the wetland is isolated. For example, if inlets or pipes are present in the vicinity of the subject wetland, a map of the storm sewer system depicting the endpoint and invert elevations of the inlet or pipe.
